

Auto Social Media Posts:

Your accounts stay active with posts created, scheduled and published

AI Voice Agent:

Your customers calls can be answered all at the same time and the inquiries? Answered with your business data

"No coffee required"

Web Automation:

Imagine that you can automate your pc to run chrome and search anything for you or do your work or maybe send WhatsApp messages

Smart Parking Ticketing System:

Instead of sending stuff to issue tickets for cars, you can put a 360 cam on top of a car and let computer vision do the work while you driving.

Knowledge Retrieval (RAG):

Chat bots only can guess but with rag they can access, your database, documentations, learn and answer from them "always up to date"
